

# Total greenhouse gas emissions by sector

57.1 Gt CO<sub>2</sub> in 2023

Non-CO<sub>2</sub> greenhouse gases are converted to CO<sub>2</sub> equivalents using global warming potentials with a 100-year time horizon from the IPCC AR6 WGI (Forster et al., 2021). Sources: Crippa et al. (2024), Friedlingstein et al. (2023).
