

Italy

Greenhouse gas emissions (MtCO₂e/year)

Sectors & shares of gross emissions in 2023

Italy released an estimated 377 MtCO₂e in 2023 (excl. LULUCF), a change of -7.2 % compared to the previous year. Per capita GHG emissions were 6.4 tCO₂e in 2023. Cumulative CO₂ emissions since 1850 were 25.3 GtCO₂, or about 1% of global emissions to date. Sources: EDGAR v9, GCB 2023, UNFCCC, Grassi et al. 2021
