

Micronesia (Federated States of)

Greenhouse gas emissions (MtCO₂e/year)

Sectors & shares of gross emissions in 2023

- Energy: Power
- Energy: Industry
- Energy: Transport
- Energy: Buildings
- Energy: Fuel production
- 0% Industrial processes
- 90% AFOLU: Agriculture
- AFOLU: LULUCF
- 10% Waste & Other

Micronesia (Federated States of) released an estimated 0.0494 MtCO₂e in 2023 (excl. LULUCF), a change of +1 % compared to the previous year. Per capita GHG emissions were 0.43 tCO₂e in 2023. Cumulative CO₂ emissions since 1850 were 0.00715 GtCO₂, or about 0% of global emissions to date. Sources: EDGAR v9, GCB 2023, UNFCCC, Grassi et al. 2021
