

Timor-Leste

Greenhouse gas emissions (MtCO₂e/year)

Sectors & shares of gross emissions in 2023

- 8% Energy: Power
- 4% Energy: Industry
- 17% Energy: Transport
- 5% Energy: Buildings
- 10% Energy: Fuel production
- 0% Industrial processes
- 51% AFOLU: Agriculture
- AFOLU: LULUCF
- 6% Waste & Other

Timor-Leste released an estimated 2 MtCO₂e in 2023 (excl. LULUCF), a change of -0.4 % compared to the previous year. Per capita GHG emissions were 1.5 tCO₂e in 2023. Cumulative CO₂ emissions since 1850 were 0.265 GtCO₂, or about 0% of global emissions to date. Sources: EDGAR v9, GCB 2023, UNFCCC, Grassi et al. 2021
