

# Total greenhouse gas emissions by sector

57.1 Gt CO<sub>2</sub> in 2023

Non-CO<sub>2</sub> greenhouse gases are converted to CO<sub>2</sub> equivalents using global warming potentials with a 100-year time horizon from the IPCC AR6 WGI (Forster et al., 2021). Sources: EDGARv9 (Crippa et al. 2024); GCB 2023 (Friedlingstein et al. 2023).
